Objective

Motivated and self-driven final year student of Information Technolgy with a strong foundation in web development and hands-on experience in building full-stack projects. Eager to contribute and grow as a Full Stack Web Developer by leveraging my skills in modern web technologies and a passion for building scalable, user-focused applications.

Technical Proficiencies

- Languages: C/C++ Data Structures, Basic Java ,JavaScript
- DataBases: MongoDB MySQL
- Tools: Git,VS code, PostMan
- Web: HTML,CSS, ReactJs, NodeJs, ExpressJs, NextJs

Education

Institute Of Engineering And Technology,Davv, BE in Information Technology   Nov 2022 – May 2026
- GPA: 7.3/10

Projects

StudyBooth website   june-2025
- StudyBooth is a fully functional ed-tech platform that enables users to create, consume, and rate educational content. The platform is built using the MERN stack, which includes ReactJS, NodeJS, MongoDB, and ExpressJS.
- StudyNotion aims to provide:
  - A seamless and interactive learning experience for students, making education more accessible and engaging.
  - A platform for instructors to showcase their expertise and connect with learners across the globe.

Virtual Ai Assistant   June 2025 – july 2025
- Built an intelligent virtual assistant using the MERN stack integrated with Google's Gemini API.
- The assistant engages in real-time conversations with users, understands natural language input, and performs assigned tasks.
- Implemented seamless frontend-backend communication, user interaction handling, and task automation with a focus on responsiveness and usability.
- Implemented secure user authentication with JWT tokens and password hashing using bcrypt.
